### Report

**Report Type:** Statement of Compliance - BCA Access Provisions  
**Development:** 182-198 Victoria Road and 28-30 Faversham Street, Marrickville

### Introduction:
This report has been prepared to accompany a Development Application and has been based on the following drawings prepared by Turner dated 11/11/2019:

### Limitations and Copyright Information:
This report is not to be used for any other purpose than its original intention. The assessment is based on the provided drawings and compliance relies upon the implementation of all the recommendations listed in this report and the works constructed in accordance with AS1428.1-2009 and other latest, relevant standards and regulations applicable at the time of construction.

Assessment is based on the classification/use of the building. If the Class of the building changes to any other building Class, this access report will have to be updated accordingly.

All dimensions mentioned in the report are CLEAR dimensions and are not to be reduced by projecting skirting, kerbs, handrails, lights, fire safety equipment, door handles less than 900mm above FFL (finished floor level) or any other fixtures/fit out elements. Only some numerical requirements from relevant AS (Australian Standards) have been noted in the report, however for further details and for construction purposes refer to the relevant AS, a copy of which can be purchased from SAI Global.

This report and the drawings in this report are a copyright of Accessible Building Solutions and can only be used for the purposes of this particular project and can only be modified by Accessible Building Solutions. This document may also contain Standards Australia Ltd copyrighted material which may not be reproduced.

This report does not assess compliance matters related to WHS, Structural design, Services design, Parts of DDA other than those related to APS or Parts of BCA or Parts of Australian Standards other than those directly referenced in this report.

ABS gives no warranty or guarantee that this report is correct or complete and will not be liable for any loss arising from the use of this report. We are not to be held responsible if LHA comes to a different conclusion about compliance with the Livable Housing Guidelines. At this point of time only LHA is able to confirm whether a project has met all the requirements needed to be awarded a particular Quality Mark.

We have no ability to check for slip resistance of surfaces. All wet areas, parking areas, pavement markings shall have the appropriate slip resistance for the location. We also have no ability to check for wall reinforcements once the walls have already been constructed. The builder is to take full responsibility that these requirements are met as a part of construction being as per requirements of AS1428.1/ AS4299 / AS2890.6/ AS3661/ AS4586

A report issued for DA (development application) is not suitable for use for CC (construction certificate application).
Assessment:

Assessment Criteria  DA
This assessment has been undertaken to the extent necessary to issue development consent under the Environmental Planning and Assessment Act. Generally, assessment has been in regard to the capability of the proposal to achieve compliance where there is insufficient information to fully assess if compliance has been achieved. The project documentation should incorporate the requirements as listed in this report to ensure compliance.

Compliance is required with the following:
- The Access provisions of the BCA
- The Access To Premises Standard
- AS1428 suite of Standards
- AS2890.6 for car parking
- AS1735.12 for lifts
- AS4299 Adaptable Housing
- SEPP 65 – Part 4Q
- Council’s DCP relating to Access for People with a Disability

Assessment
The building comprises of basement carparking with ground floor retail units and residential units above.

Under the BCA the building is classified as follows,
- Class 2 (building containing more than 2 SOUs i.e. sole-occupancy units)
- Class 6 (shops, sale of goods and services by retail)
- Class 7a (car park)
The following tables assess compliance with the relevant parts of the BCA and Standards

**BCA Assessment**

### BCA Part D3 Access for People with a Disability

**BCA D3.1 Requirements for Access for people with a disability**

SOU refers to Sole Occupancy Unit

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Class 2</th>
<th>Compliance</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Requirement</strong></td>
<td>From a required accessible pedestrian entrance to at least 1 floor with SOUs and till the entry of doors of each SOU on that level.</td>
<td>Complies.</td>
<td>Access has been provided from the main pedestrian entry to the entry doors of all SOUs on all levels by means of a lift. Access has been provided to communal open space on Level 1 and Ground Floor communal facilities room. Details to be verified at CC stage of works.</td>
</tr>
<tr>
<td><strong>Requirement</strong></td>
<td>To and within 1 of each type of room or space in common use.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Requirement</strong></td>
<td>Where floor is accessed by an AS1428.1 ramp or lift, all SOUs on that level till the entry door and to and within all common use areas on that level.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Requirement**

Class 5, 6, 7b, 8, 9a, 9b- Schools and early childhood centres

To and within all areas that are normally used by the occupants.

**Requirement**

Class 7a

To and within any level containing accessible car parking spaces.

**Requirement**

**In areas required to be accessible, the following is to be provided:**

- Width of accessways shall be min 1M clear, and to be increased for door circulation, turning areas and passing areas as required by AS 1428.1
- Doors shall provide a clear opening of 850mm with a step free threshold and the required circulation spaces, hardware and luminance contrast as required by AS 1428.1
- Door mats, floor grates and the abutment of different finishes shall comply with BCA and AS 1428.1
- In accessible sole occupancy units, the light switches shall be 30x30mm min size at a height to match the door handles. GPOs shall be located between 600 and 1100mm above the floor and 500mm from an internal corner.

**Compliance**

Capable of compliance.

**Comments**

All of the above listed requirements are achievable and to be assessed for compliance at verified at CC stage of works.
### BCA Part D3.2 Access to buildings

**Requirement**

Accessway is required from:
- Main pedestrian entry at the site boundary for new buildings
- Main pedestrian entry door for existing buildings
- Any other accessible building connected by a pedestrian link
- Accessible car parking spaces

**Compliance**

Complies.

**Comments**

Access has been provided from the main pedestrian entry at the site boundary by means of a pathway / ramp.

Access has been provided from accessible car parking spaces by means of a lift.

Details to be verified at CC stage of works.

### Requirement

**Accessway** is required through:
- Main entry and
- Not less than 50% of all pedestrian entrances and in building with floor area over 500m², non-accessible entry and accessible entry to be not more than 50M apart.

**Compliance**

Capable of compliance.

**Comments**

Details to be verified at CC stage of works.

### Requirement

Where **Accessible pedestrian entry** has multiple doorways
- At least 1 to be accessible if 3 provided
- At least 50% to be accessible, if more than 3 provided

Where doorway has multiple leaves, at least 1 leaf is to have clear opening of 850mm (excluding automatic doors).

**Compliance**

Capable of compliance.

**Comments**

Where multiple leaf doorways have been used, at least 1 operable leaf is required to provide a clear opening of 850mm with the door circulations spaces as per AS1428.1.

Where single hinged doors have been used, the door leaf is required to provide a clear opening of 850mm with the door circulations spaces as per AS1428.1.

This is achievable and the door selections are to be verified at CC stage of works.

### BCA Part D3.3 Parts of buildings required to be accessible

**Requirement**

Every **Ramp** (excluding fire-isolated ramp) to be compliant with AS1428.1 and slip resistance of ramp and landings compliant with BCA Table D2.14

**Compliance**

Capable of compliance.

**Comments**

Detailed features of the ramp will be assessed with the requirements of AS1428.1 at the CC stage of works.

**Requirement**

Every **Walkway** to be compliant with AS1428.1

**Compliance**

Capable of compliance.

**Comments**

Detailed features of the walkways will be assessed with the requirements of AS1428.1 at the CC stage of works.

Note: all walkways shall have a barrier or continue for a further 600mm in a different material on each side of the walkway.
<table>
<thead>
<tr>
<th>Requirement</th>
<th>Compliance</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Step / Kerb ramp</strong> if provided is to be compliant with AS1428.1 and Slip resistance of ramp and landings compliant with BCA Table D2.14</td>
<td>N/A</td>
<td>No step / kerb ramps have been identified in the development.</td>
</tr>
<tr>
<td>Every <strong>Stairway</strong> (excluding fire-isolated stairway) is to be compliant with AS1428.1 and slip resistance of treads, landings and nosing strips compliant with BCA Table D2.14</td>
<td>Capable of compliance</td>
<td>Where non-fire-isolated stairways have been provided, the features of the stairway will be assessed with the requirements of AS1428.1 at the CC stage of works.</td>
</tr>
<tr>
<td>Every <strong>Fire-isolated Stairway</strong> is to be compliant with the relevant sections of AS1428.1 &amp; slip resistance of treads, landings and nosing strips compliant with BCA Table D2.14</td>
<td>Capable of compliance</td>
<td>Where fire-isolated stairways have been provided, the features of the stairway will be assessed with the relevant requirements of AS1428.1 at the CC stage of works.</td>
</tr>
<tr>
<td><strong>Passing spaces requirement</strong> It is a requirement to provide passing spaces in accessways complying with AS1428.1 at maximum 20 M intervals, where a direct line of sight is not available. Space required is width of 1800mmx2800mm (in the direction of travel). Chamfer of 400x400mm is permitted at corners.</td>
<td>N/A</td>
<td>There are no accessways over 20 M lengths in the development where a direct line of sight is not available.</td>
</tr>
<tr>
<td><strong>Turning spaces requirement</strong> It is a requirement to provide turning spaces in accessways complying with AS1428.1 within 2M of the end of accessways where it is not possible to continue travelling and at every 20M intervals. Space required is width of 1540mm x 2070mm (in the direction of travel).</td>
<td>Complies</td>
<td>Adequate turning spaces have been provided. Details to be verified at CC stage of works.</td>
</tr>
<tr>
<td><strong>Small building concession</strong> In a Class 5, 6, 7b or 8 building containing not more than 3 storeys, a lift / ramp is not required to provide access to levels other than the entrance level if the floor area of the levels other than the entrance level is not more than 200m².</td>
<td>N/A</td>
<td>Carpet specifications are to be provided with pile height or thickness not more than 11mm and carpet backing not more than 4mm bringing the total height to a maximum of 15mm.</td>
</tr>
<tr>
<td><strong>Carpet specifications</strong> Carpet if used in areas required to be accessible are to be provided with pile height or thickness not more than 11mm and carpet backing not more than 4mm bringing the total height to a maximum of 15mm.</td>
<td>Capable of compliance</td>
<td>Only applies to carpets provided in the common use areas and retail use areas. Carpet selections generally take place at CC stage of works. Selection of carpets as specified above will lead to compliance and these selection details are to be verified at CC stage of works.</td>
</tr>
</tbody>
</table>
## BCA Part D3.4 Exemption

**Access is not required to be provided in the following areas:**

- where access would be inappropriate because of the use of the area
- where area would pose a health and safety risk
- any path which exclusively provides access to an exempted area

For information only.

Areas such as lift machine rooms, fire services room, and mechanical rooms in the development are exempted from providing access under this clause due to WHS concerns.

---

## BCA Part D3.5 Accessible Carparking

### Parking Service

Accessible carparking space need not be provided when a parking service is provided and direct access to any of the carparking spaces is not available to the public.

**Compliance Comments**

N/A

### Requirement

Accessible car parking spaces shall have pavement marking in accordance with AS 2890.6.

**Compliance Comments**

Complies.

Note: the pavement marking shall have the appropriate slip resistance for the location.

### Requirement

In situations where not more than 5 carparking spaces have been provided

The car parking space need not be designated, so as to restrict the use of the carparking space only for people with a disability.

**Compliance Comments**

N/A

### Requirement

**Class 2**

There are no carparking requirements for a Class 2 under the BCA. If adaptable housing has been mandated by the Council, carparking spaces will be required under the requirements of AS4299- Adaptable housing

**Compliance Comments**

N/A

The parking for the adaptable units is assessed later in this report.

### Requirement

**Class 5, 7, 8 or 9c**

- 1 space per 100 carparking spaces

**Class 6**

- 1 space per 50 carparking spaces (up to 1000 spaces) and additional 1 space per additional 100 spaces provided

**Compliance Comments**

Complies.

Total number of spaces provided = 65
Total number of Accessible car parking spaces required = 2
Total number of Accessible car parking spaces provided = 2

Car parking spaces are to comply with the requirements of AS2890.6. This is to be verified at the CC stage of works.

An additional 27 retail visitors spaces are provided which include 5 accessible car parking spaces.
## BCA Part D3.6 Signage

**Requirement**
Braille and Tactile signage is required to identify Accessible Sanitary facilities, Fire Exits and the location of accessible entrances and toilets

**Compliance**
Capable of compliance.

**Comments**
Verify at CC.

## BCA Part D3.8 Tactile indicators (TGSIs)

**Requirement**
TGSIs are required when approaching:
- Stairways other than fire-isolated stairways and stairways within a SOU of a Class 2 building or a non-accessible SOU of a Class 3 building
- Escalators / passenger conveyor / moving walk
- Ramp (other than fire-isolated ramps / kerb or step or swimming pool ramps)
- Under an overhead obstruction of <2M if no barrier is provided
- When accessway meets a vehicular way adjacent to a pedestrian entry (if no kerb / kerb ramp provided at the location)

Compliance is required with AS1428.4.1 including Luminance contrast and slip resistance requirements for all TGSIs.

**Compliance**
Capable of compliance.

**Comments**
In the proposal, TGSIs are required in the following locations:
- At top and bottom landings of stairways and 1:14 ramps, 600-800mm depth or min 12 discrete cones are required at 300+/-10mm from edge of hazard
- At mid landings of stairway and 1:14 ramp, 300-400mm depth or min 6 discrete cones are required only where handrails are not continuous or landing is more than 3M
- Where accessway meets a vehicular way, 600-800mm depth or min 12 discrete cones are required at 300+/-10mm from edge of hazard.
- Under the stairway to warn of overhead obstruction, 600-800mm depth or min 12 discrete cones are required at 300+/-10mm from edge of hazard

Details to be verified at CC stage of works.

## BCA Part D3.11 Limitations on Ramps

**Requirement**
- A series of connecting ramps cannot have a vertical height of 3.6M
- A landing for a step ramp cannot overlap a landing for another ramp

**Compliance**
Complies

**Comments**
The series of connecting ramps do not exceed a vertical height of 3.6M
Details to be verified at CC stage of works.
BCA Part D3.12 Glazing on Accessways

**Requirement**
Glazing requirements - Where there is no chair rail, handrail or transom, all frameless or fully glazed doors, sidelights and any glazing capable of being mistaken for a doorway or opening are required to have a glazing strip as per requirements of AS1428.1

**Compliance**
Capable of compliance

**Comments**
Applies to full length glazing used in common use areas such as lift lobbies and common passageways and in all commercial use areas.
Glazing strip selections generally take place at CC stage of works.
Selection of glazing strips as specified above will lead to compliance and these selection details are to be verified at CC stage of works.

BCA Part F Accessible Sanitary Facilities

**BCA F2.4 Accessible sanitary facilities**

**Requirement**
Accessible unisex toilet is to be provided in accessible part of building such that;
- It can be entered without crossing an area reserved for 1 sex only
- Where male and female sanitary facilities are provided at different locations, Accessible unisex toilet is only required at one of the locations
- Even distribution of LH and RH facilities
If no lift is required to be provided to a level, then accessible facility is not required on that level.

**Compliance**
Complies.

**Comments**
Common use unisex accessible toilet facilities have been provided in the development. Details are not provided and to be verified at CC stage of works.

**Requirement**
Accessible unisex toilet are to be designed in accordance with AS1428.1

**Compliance**
Capable of compliance

**Comments**
The width and length requirements depend on selected fixtures.
Minimum size of an accessible toilet is required to be 1.9M x 2.7M after tiling works. Details are not provided and to be verified at CC stage of works.

**Requirement**
Ambulant use male / female toilets are to be provided if an additional toilet to the Accessible unisex toilet is provided.

**Compliance**
Complies

**Comments**
The following Ambulant facilities have been provided
- 1 Male Ambulant use toilets
- 1 Female Ambulant use toilets

**Requirement**
Ambulant use toilets are to be designed in accordance with AS1428.1.

**Compliance**
Complies with the width and length requirements

**Comments**
Minimum size of an accessible toilet is required to be 900mm to 920mm width x 1.62M (dependent on WC pan and location of door to the cubicle)
To be verified at CC stage of works.

DCP Requirements

Adaptable Housing

55 adaptable units have been provided. The units designated as adaptable are Units 5X02 on Levels 2-11, Units 4X04 on Levels 1-11, Units 2X04 on Levels 1-5, Units 3X05 & 3X08 on Levels 7-10, Units 3X01 on Levels 1-10, Unit 5X02 on Level 1, Units 3X06 & 3X07 on Levels 7-10, Unit 3.11.02 on Level 11 & Unit 3.11.03 on Level 11.

At DA stage there is insufficient information to certify compliance with the Standard, however, in accordance with the table below, the units can comply with the spatial requirements of AS4299 for Adaptable Housing.

</tbody>
</table>
SEPP 65 – Part 4Q1

Compliance assessment with Objective 4Q1 that requires 20% of the units to incorporate the features of the Livable Housing Guidelines Silver level.

Total number of residential units in the development = 20% of 272 = 54.4 = 55 required Livable units.

Since 55 of the units already comply with the Adaptable unit requirements, these units are also capable of satisfying the intent of Silver level of Livable Housing Guidelines as noted in the table below.

By incorporating the requirements of the below Checklist in the Specifications of the project, the nominated Livable units can achieve full compliance with Livable Housing Guidelines- Silver Level.

Note that in this case the adaptable units are also be counted as Livable / LHA Silver level unit in which case the below requirements apply in addition to the AS4299 requirements.

| **4 Toilet**  | (a) Toilet to be provided on the ground or entry level that provides,  
                   (i) Min 900mm between walls if located in separate room  
                   (ii) Min 1200mm clear space in front of the WC pan exclusive of  
                         door swing.  
                   (iii) The toilet pan to be positioned in the corner of a room to enable  
                         handrails  
                   Complies. Verify at CC |
| **5 Shower**  | (a) One bathroom should feature a slip resistant, hobless shower  
                   recess. Shower screens are permitted provided they can be easily  
                   removed at a later date.  
                   (b) The shower recess should be located in the corner of the room to  
                   enable the installation of grabrails at a future date.  
                   For hobless specification please see Australian Standard AS3740-3.6.  
                   Reinforcement guidelines for walls in bathrooms and toilets are found in  
                   element 6  
                   Capable of compliance. Verify at CC |
| **6 Reinforcement**  | (a) Except for walls constructed of solid masonry or concrete, the walls  
                   around the shower, bath (if provided) and toilet should be reinforced  
                   to provide a fixing surface for the safe installation of grabrails.  
                   Capable of compliance. Verify at CC  
                   (b), (c) and (d) the walls around toilet, bath and shower to be via:  
                   (i) Noggins with a thickness of at least 25mm  
                   (ii) Sheeting with a thickness of at least 12mm  
                   Refer to diagrams provided in the Livable Housing Guideline document.  
                   Capable of compliance. Verify at CC |
| **7 Internal**  | Stairways in dwellings must feature:  
                   (i) a continuous handrail on one side of the stairway where  
                   there is a rise of more than 1m. a minimum clear width of  
                   1000mm  
                   N/A  
                   No internal stairway in units.  
                   Stairways  
                   N/A  
                   No internal stairway in units. |
Statement of Compliance
On the basis of the above assessment, I am satisfied that the proposal can achieve compliance with the access provisions of the BCA, SEPP 65 and the essential requirements of AS4299 – Adaptable Housing.
Statement of experience

Howard Moutrie
